Category : General Problems of Pathology. Tumors. Comparative Oncology. Human Tumors
Abs. Jour. : Ref Zhur-Biol, 1959, No 4, 18359
Author : Cholakov, G.
Institut. : Iz khirurgichnogo otdeleniia na MSCH II - gara Iskur.
Title : A Case of Unusual Localization of Struma
Orig. Pub. : Khirurgiya (Bulg.), 1957, 10, No 4, 363
Abstract : A 25-year-old woman, in her 1st month of pregnancy, developed a tuberculate induration in the supraclavicular area. Dyssomnia, tachycardia, emaciation, and increase of basal metabolism were observed. After 7 years, the tumor was removed and found to be a papillary cystadenoma of the thyroid gland.-- A. I. Ashkenazi

ORIG. PUB.	:	Khimiya i Industriya (Bulgaria), 30, No 6, 162-164 (1958)	
ABSTRACT	:	The authors have studied the effect of the addition of CaCl_2 on the extraction of K. An increase in the degree of extraction of potassium is obtained when the syenite is decomposed hydrothermally with the addition of CaCl_2 or mixtures of CaCl_2 and CaCO_3 ; the K, Na, and the greater portion of the calcium go into solution in the form of the chlorides, which facilitates the subsequent processing. The maximum yield of K_2O (98.1%) is obtained at a CaCl_2 : syenite ratio

A study was made of the kinetic aspects of the polymerization of α -methylstyrene with TiCl_4 in benzene at -78°C . leading to the formation of azeotropic copolymers. It was shown that the azeotropic content of the copolymer is a function of the

the copolymerization constants of these monomers, the results were
